

Hi,

I am writing to express my strong interest in the Junior Front-End Developer position at Bookbost, which I discovered on Platsbanken. With a robust foundation in full-stack software development, particularly in C#/.NET, and a commitment to modern development methodologies, I am confident in my ability to contribute effectively to your team.

My recent experience includes designing and implementing scalable backend services using C# and .NET, with a focus on clean architecture and maintainability. For instance, during my roles at Trivseldata AB and CGI, I developed and maintained both backend and frontend applications using technologies such as React, and crafted RESTful APIs to enhance system integration. I also have practical experience in containerizing applications with Docker and implementing CI/CD pipelines through GitHub Actions, ensuring streamlined deployment and environment consistency.

I thrive in agile, collaborative environments and am dedicated to continuous learning. My professional approach is characterized by a proactive mindset in exploring new technologies, such as Angular and various cloud platforms, to deliver high-quality, maintainable solutions. I am adept at problem-solving and consistently aim to improve code quality and system performance through practices like code reviews and comprehensive documentation.

I am a highly collaborative and adaptable professional, driven by a curiosity to stay current with advancements in cloud computing, secure coding, and DevOps practices. My objective is to contribute to innovative projects that make a tangible impact, always maintaining a strong sense of accountability to meet both technical and business needs.

Thank you for considering my application. I am eager to discuss how my skills and proactive approach align with the goals of Bookbost and the requirements of this role. I look forward to the opportunity to learn more about this position.

Sincerely,

Dwina Larsson
